1. Have you identified any risk situations throughout the year of the project? How many?

es. One = teacher / students who could not go on a mobility due to a last minute problem.

2. Explain these risk situations and how you have resolved them.

During the Italian mobility the rule was: only fully vaccinated people could go. So, we had to change one teacher, because she wasn't vaccinated. Also, 2 of the students were tested with rapid tests only in the morning of the departure, they tested positive and they had to remain at home. They could not be replaced, as it was too late.

3. During the project have you guided yourself according to the Risk Register?

es. We did everything according to it.

4. Have you identified any other risk situations which weren't listed in the Risk Register throughout the years of the project? Which ones?

o.

5. Has the Risk Register been useful for thinking, preventing or/and solving any of your risks?

es, it was, up to a point. Unfortunately, in the case of the 2 students replacement was no longer possible, due to the lateness of testing .
